1. Airshed Submissions

NOTE: Beginning November 15, 2019 at 5:00 pm MST, airsheds will submit all air reports and data to ETS and NOT to the airdata warehouse.

Airshed submissions to ETS include:

- Ambient air data, including continuous and non-continuous (passive, canister, PUF, etc.) data (XML file), accompanied by (as applicable):
 - PDF calibration report (for continuous ambient data)
 - PDF certified laboratory analysis report (for non-continuous ambient data)
- PDF reports:
 - monthly and annual airshed air monitoring reports
 - monitoring plan
 - site documentation
 - airshed ambient monitoring notifications (as per AMD Notification Template)
- Airsheds must use the file naming conventions provided in the [EPEA Approval Industrial Monitoring Documentation Submission Naming Guideline](#)

Ambient XML Schema

Effective November 15, 2019 after 5 p.m. MST, Version 2.0 of the ambient XML schema must be used in the submission of ambient data to be accepted by ETS:

This means:

1. The new ambient XML schema must be used from that date going forward for new data sets and for the resubmission of historic data;
2. The new ambient XML schema is for use by all ambient data submitters (industrial and airshed);
3. Submitting ambient data using the V1.9 schema will **NOT** be accepted by ETS going forward;
4. Version 2.0 of the Reference Tables must be used in conjunction with Version 2.0 of the ambient XML schema. A new version of the Ambient Schema Guidance document will be added in the near future.

More information on Version 2.0 of the ambient XML Schema can found at Alberta Online Learning website: <https://training.energy.gov.ab.ca/Pages/Air.aspx#Ambient>

2. ETS

Introduction to ETS

- The Electronic Transfer System (ETS) provides secure access to do business electronically with the Government of Alberta. Holders of an authorized Account may access the services available through ETS.
- To have access to ETS, you will need to apply for access. More information can be found at: <https://www.alberta.ca/Electronic-transfer-system.aspx>
- Once the application is successful, the role of the Site Administrator will be created by the Government of Alberta. The Site Administrator is responsible for creating and maintaining Client Accounts and assigns the role for Coordinator. Individual accounts (called a Client Account) are subsets of the Site Administrator Account.
- Each Client Account is assigned a role that defines the required functionality. The Coordinator is responsible for assigning the levels of access to ETS based on the role an individual has within the company.
- Once the Client Account is created, the individual can logon to the secure ETS website using this new Client Account login Id and password.

Air

The air reporting module is a new feature in ETS that allows for electronic submission of air data and reports as per [Air Monitoring Directive](#) requirements.

If you have general questions on the Air Monitoring Directive, please contact AMDFeedback@gov.ab.ca.

If you have questions on the submission of air data and reports required by your approval, please contact air.reporting@gov.ab.ca.

- Courses
- Forms
- AMD Form XML Schemas
- Ambient XML Schema

Please Note: Minor changes may still be made to the XML schemas and AMD Forms to address any bugs that may arise. Stakeholders will be notified if changes are made.

Courses

Module

ETS Air Data Submission Training Manual
This module will offer an overview on how to submit air data in ETS. (Feb 20, 2019)

Forms

Excel 2010 or later must be used to populate the forms. Earlier versions of Excel will convert the AMD forms for compatibility, which would make them unacceptable for upload into the new air data management system. Excel forms that have been converted will not be accepted.

Refer to the correlating XML schema for each form for descriptions of each field and a listing of which fields are required.

Or you can use the link www.alberta.ca/ets.

Technical Requirements

Ensure you have access to the Internet and a Computer that meets the Minimum Technical Requirements.

The ETS website is a secure environment protected by 128-bit encryption via SSL, identified by a certificate of authentication.

To use the secure ETS website properly, stakeholders must ensure they (or their service provider) have access to a computer with Internet access. Those who do not have their own computer can use any computer with internet access (e.g. local library).

ETS Support and Web Browser Compatibility

- ETS supports Chrome, Microsoft Edge, Internet Explorer 11.0 or higher, and Firefox 50.0 or higher.
- Pop-ups must be enabled in your web browser to access reports (i.e. submission or error reports).
- If you require support with existing ETS accounts or setting up a new account, please contact ETSAccountSetup@gov.ab.ca or 780-644-2300.
- If you require technical support with ETS, please contact ETS@gov.ab.ca or 780-908-4969.
- Technical support will only be available during business hours: 8:15 AM – 4:30 PM Monday to Friday.

Submission Failure or ETS Outage

It is recommended that airsheds submit their data, forms and reports well before the due date to ensure adequate time for submission, should a submission failure occur. If there is a submission failure, time would be required to correct the errors identified in the error report and resubmit.

Planned ETS maintenance or outages will be posted on the ETS site and communicated to ETS users. If unable to meet reporting timelines due to an ETS outage, airsheds should:

- Provide notification to Air.Data@gov.ab.ca of inability to submit due to outage; and
- Complete the air submission within 24 hours of being notified that the website is operational.

ETS Support

- **Support:** Report problems or questions to Crown Land Data at (780) 644-2300.
- ETS may be unavailable due to system maintenance on Friday after 4:30 p.m. until 6:00 pm Sunday.
- If you require support with existing ETS accounts or setting up a new account, please contact ETSAccountSetup@gov.ab.ca.
- If you require technical support with ETS, please contact ETS@gov.ab.ca or 780-908-4969.
- **Note that technical support will only be available during business hours, so it is important to ensure the data is submitted within the business hours timeframe: 8:15 AM - 4:30 PM Monday to Friday.**

3. ETS User/Role Management

Each Client Account must be assigned a role which defines the functionality that this account can access while on the website. This is designed to allow organizations to delegate specific functionality to certain accounts for different forms in order to maximize the visibility of secure information to those authorized to view that information.

The roles available in ETS are:

- **Site Administrator**
 - Create accounts and assign Coordinator role for the area operator in ETS account node
- **Coordinator**
 - Can create stations and assign roles by station within the assigned “area operator” in admin module
- **Station Manager**
 - Can modify ambient station details and assign reference data. Role can be assigned by station.
- **Reviewer**
 - Can review *Pending Review* submissions of others and pass or fail them, progressing them to *Submitted* or *Review Failed* status. Can view and edit the submissions of others. Role can be assigned by station.
- **Submitter**
 - Can create requests and begin the submission process; data will be validated and submission will progress to *Pending Review* but not to *Submitted*. Cannot view submissions of others. Role can be assigned by station.
- **Viewer**
 - Can view the submissions of other users and view station information. Role can be assigned by station.

ETS Role Assignments Chart

Roles	Role Assignment by Station	Create Station	Update Ambient Station info (includes assigning VVC, equipment)	See Stations (read-only)	Submit (create a submission)	Review (sign off on a submission)	View Submissions (work in progress)
Coordinator	Yes	Yes	No	Yes	No	No	Yes
Station Manager	No	No	Yes	Yes	No	No	No
Reviewer	No	No	No	Yes	No	Yes	Yes
Submitter	No	No	No	Yes	Yes	No	No
Viewer	No	No	No	Yes	No	No	Yes

ETS Role Management

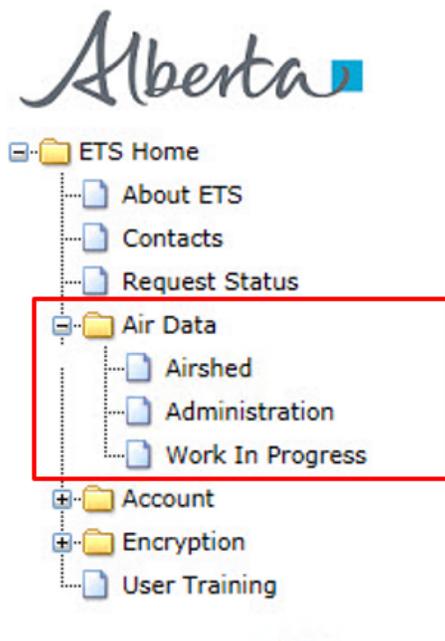

Once you have signed in to ETS, the “**Air Data**” tree node will appear on the left of the screen.

The “**Air Data**” node has 3 sub-nodes (all circled in red). The “**Air Data**” sub-nodes are:

- “**Airshed**” – for the Submitter to make data submissions, manage warnings/errors, data resubmissions;
- “**Administration**” – for the Coordinator to assign roles (i.e. Submitter, Reviewer, Viewer, and Station Manager) to users. Also, users can identify the roles assigned to them;
- “**Work In Progress**” – for Submitter, Reviewer, and Viewer to see the status of the data submission. The Reviewer accesses this node to review submissions requiring accept or reject.

To access any one of the sub-nodes, click on the “**Air Data**” node.

NOTE: For you to see the “**Airshed**” sub-node, you must be assigned the Submitter role. If you are not assigned that role, the “**Airshed**” sub-node will not appear.

Creating Users (Site Administrator)

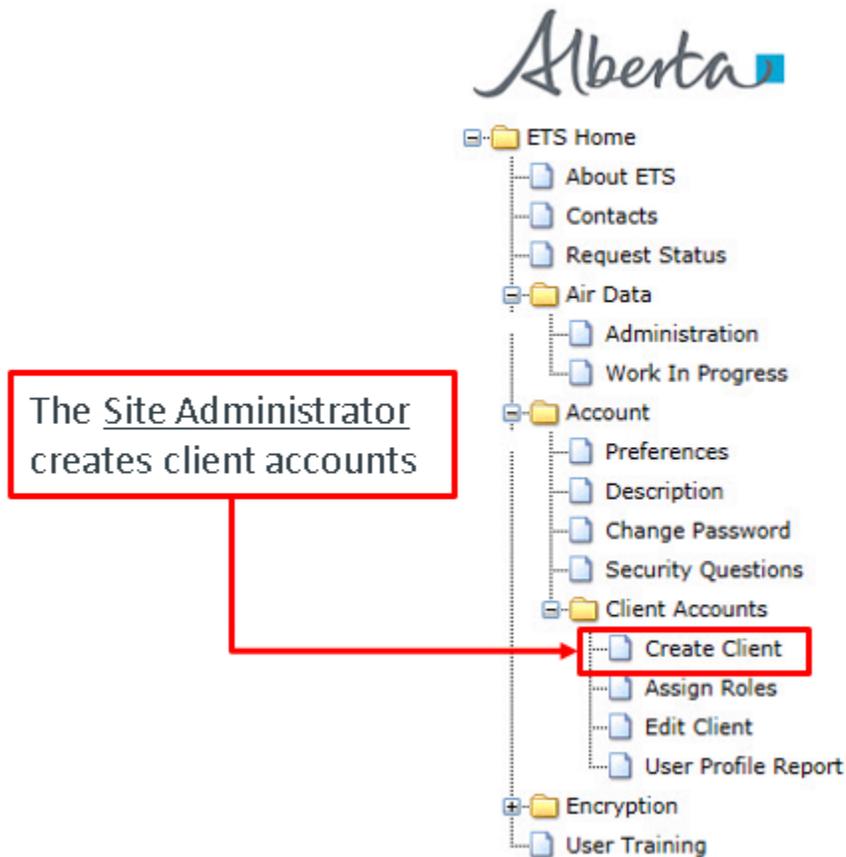

Before roles can be assigned, users must be created and this is done by the Site Administrator only.

To create the users, the Site Administrator signs in to ETS. When this screen at left is appears, the Site Administrator clicks on the on the “**Create Client**” sub-node (circled in red).

To get to “**Create Client**” node the Site Administrator clicks on:

- “**Accounts**” node and ;
- “**Client Accounts**” sub-node.

Once, the Site Administrator coordinator clicks on “**Create Client**” sub-node, the process of creating users will start.

Once, the Site Administrator coordinator clicks on “**Create Client**” sub-node, the “**Create Client Account**” form appears (on left) where the following mandatory information is filled in:

- Client Account Name;
- Password – twice (Password and Repeat Password);
- First Name;
- Last Name;
- Phone Number; and
- Email address – twice.

The Fax Number and Business Area are optional.

The Site Administrator then clicks the “*Submit*” button to create the account.

Create Client Account

***Client Account Name (maximum length is 13 characters):**

***Password (12-127 chars):** ***Repeat Password:**

***First Name:**

***Last Name:**

***Phone Number (999) 999-9999:** **Fax Number (999) 999-9999:**

***Email Address:**

***Repeat Email Address:**

Business Area:

*** - denotes Required Field**

For more information on:

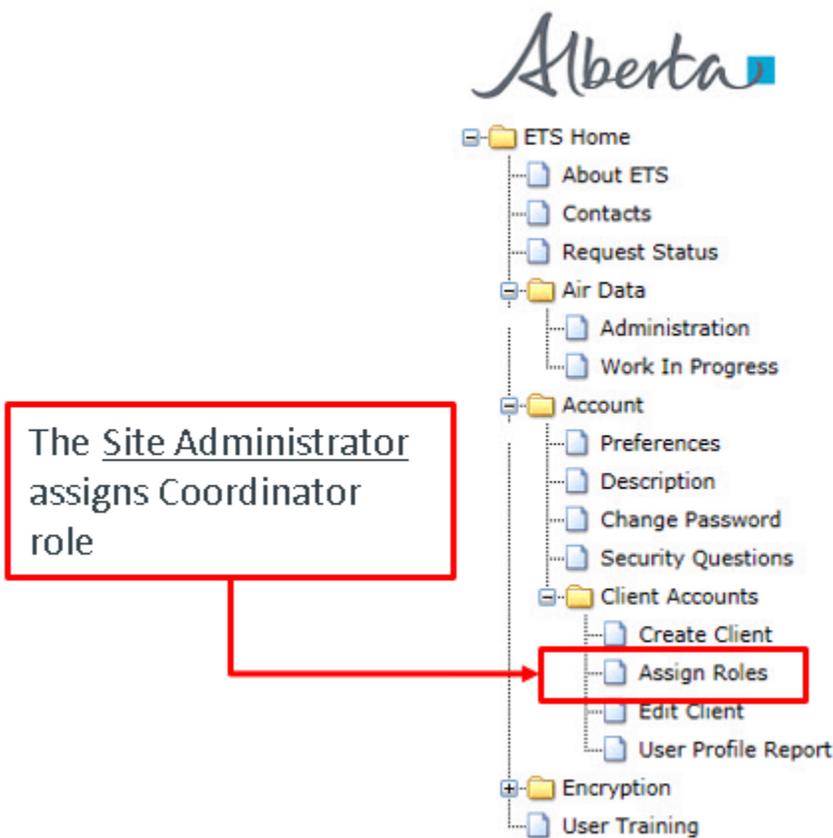

1. Creating users, refer to “*ETS Client Account Setup and Maintenance*” at https://training.energy.gov.ab.ca/Courses/ETS_client_account_setup_and_maintenance.pdf
2. Site Administrator, refer to “*ETS Account Setup and Preferences*” at https://training.energy.gov.ab.ca/Courses/ETS_account_setup_and_preferences.pdf

Assigning a User the Coordinator Role (Site Administrator)

After the users are created, the Site Administrator assigns the Coordinator role. Only the Site Administrator can assign the Coordinator role.

To assign the Coordinator role, the Site Administrator signs in to ETS. When this screen at left is appears, the Site Administrator clicks on the on the “**Assign Roles**” sub-node (circled in red).

Once, the Site Administrator coordinator clicks on “**Assign Roles**” sub-node, the process of assigning the coordinator role will start.

The Site Administrator assigns Coordinator role

Once, the Site Administrator coordinator clicks on “**Assign Roles**” sub-node, the “**Assign Client Roles**” form appear.

To assign the Coordinator role to the desired user, the Site Administrator will select from the dropdown list the:

“**Select Client Account**”: the user created previously to be assigned to be Coordinator;

“**Select Form Type**”: Air Data – Airsheds;

Once these fields are filled in, the Site Administrator next create a tick in the box (circled in red) to assign the role of coordinator and click the “**Save**” button confirming the assignment. (The Site Administrator has the option of removing the assignment by clicking the tick in the box to remove it).

Assign Client Roles

Select Client Account: EA1037_EDMUND -- <Edmund.Arthurton@gov.ab.ca> ▼

Select Form Type: Air Data - Airsheds ▼

Select Roles:

	Role	Description
<input checked="" type="checkbox"/>	Coordinator	User can create stations and assign roles by station/approval within the assigned company/area operator.

Feedback Copyright © 1999 Government of Alberta

The Site Administrator assigns the Coordinator role to the user by clicking the check box here.

Assigning Roles (Coordinator)

Once the Coordinator is assigned, the Coordinator now has responsibility to assign the roles of Submitter, Reviewer, Viewer, and Station Manager to users who were created by the Site Administrator.

To assign roles, the Coordinator signs in to ETS. When this screen at left is appears, the Coordinator clicks on the on the “**Administration**” sub-node (circled in red).

This can be done by clicking on:

- “**Air Data**” node then ;
- “**Administration**” sub-node

Once, the Site Administrator coordinator clicks on “**Administration**” sub-node, the assigning roles will start.

Note the Coordinator can only see the “**Administration**” and “**Working In Progress**” nodes.

The Coordinator assign roles through the “**Administration**” sub-node.

Note: The Airshed node will not be visible to the Coordinator.

Once the Coordinator clicks on the “**Administration**” sub-node, the “**Airshed Administration**” screen appears.

At the top of the screen (blue band) there are 2 choices:

- “**Station Maintenance**” - the coordinator maintain information on the stations
- “**User Roles**” - the coordinator assign various roles and stations to user(s).

To assign role(s) to user, the Coordinator clicks “**User Roles**”;

The screenshot shows the 'Air Data Administration' interface. On the left is a navigation menu with 'Administration' highlighted. At the top right is a blue header with 'Air Data', 'Station Maintenance', and 'User Roles'. The main content area is titled 'Airshed Administration' and includes a copyright notice for the Government of Alberta. Two callout boxes provide instructions: one points to the 'Administration' menu item, and another points to the 'User Roles' header option.

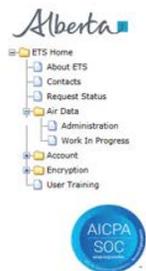

The Coordinator assign roles through the “**Administration**” sub-node.

Note: The Airshed node will not be visible to the Coordinator.

The Coordinator clicks on this selection (“**User Roles**”) to assign role(s) to user(s)

Once the Roles Maintenance screen appears, the Coordinator can now assign role(s) to the user with the following steps:

1. Identify and select the user from the “User” dropdown list;
2. Select the role for the user in the “Roles” list;
3. Select stations from the “Stations” list that will be assigned to the user;
4. Click the “Assign” button;
5. Once the transaction is successful, a green “Data has been saved” bar will appear (*Not shown here*).

Assigning Roles – Example

1. Select User from dropdown list

2. Check role(s) to be assigned to user;

3. Check station(s) to be assigned to user. Note: the stations can be searched/filtered

4. Click "Assign" Button

5. The message, "Data has been saved" indicates success

This is an example of a user that has Submitter role assigned.

4. Data Submission

Overview

The data submission process comprises of the following stages or status types:

1. *Work in Progress* – new, un-submitted requests;
2. *Click Submit* – the request is submitted for validation;
3. *Client Cancelled* – the client cancels the request by clicking on the delete button preventing further processing;
4. *Validating* – the request is validated after file submission;
5. *Validation Failed* – the request has validation errors;
6. *Pending Warnings* – the request has passed validation but has warning errors;
7. *Warning Failed* – the request cannot proceed due to being rejected at the Pending Warnings stage;
8. *Pending Review* – the request passed warning process and is reviewed by the Reviewer;
9. *Review Failed* – the request has been rejected by the reviewer;
10. *Review Passed* – the request has been approved by the reviewer;
11. *Processing* – the request has been submitted to the department; and
12. *Completed* – the request has been accepted by the department.

Overview Flow Chart

Signing In (Submitter Only)

To access the Data Submission form, the Submitter will:

1. Sign in (where the above screen appears).
2. Click on the “Air Data” node. This will expand to the sub-nodes.
3. Click on the “Airshed” sub-node.
4. The “Airshed Submission” form appears (right).

The Submitter clicks on the “Airshed” sub-node for the To get to the “Airshed” Submission” screen shown on the right.

Note: The “Airshed” sub-node is only viewable to the Submitter.

Comment:

File Type: Ambient Data

Choose File(s):

Airshed Submission Form (Submitter Only)

The following information must be filled before the files can be uploaded and submitted:

1. "Company Name" (selected from dropdown list);
2. "Comment" (optional);
3. "File Type" (selected from dropdown list);
4. "Choose File(s)" (selected using the "Browse" button and uploaded clicking the "Upload" button).

The screenshot shows the "Airshed Submission" form with the following elements and callouts:

- 1**: Callout box: "The Status - 'Work in Progress' at the start of process". Points to the "Status" dropdown menu.
- 2**: Callout box: "'Browse' button searches for the file(s) to be uploaded". Points to the "Browse..." button.
- 3**: Callout box: "*This is the list of Airshed file types:". Points to a list of file types: Ambient Data, Calibration Report, Lab Report, Airshed Monitoring Plan, Airshed Monitoring Report, Ambient Site Documentation, and Airshed Ambient Monitoring Notification.
- 4**: Callout box: "'Upload' button uploads the file(s)". Points to the "Upload" button.
- 5**: Callout box: "'Submit' button is to submit the file for validation." Points to the "Submit" button.
- 6**: Callout box: "'Save' button is to save the data to ETS where it is stored until it is submitted for review." Points to the "Save" button.
- 7**: Callout box: "'Close' button is to go back to the sign in page without saving data". Points to the "Close" button.
- 8**: Callout box: "'Delete' button cancels the submission request." Points to the "Delete" button.

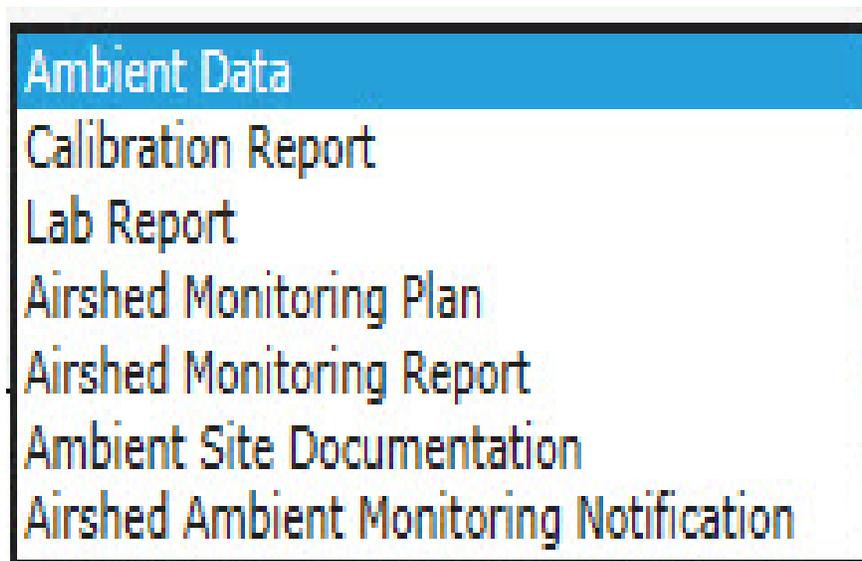

File Types

Below is the list of Airshed file types mentioned from the previous slide. The files selected for uploading must be in the file type format or an error will result.

The formats for the listed file types are:

- **Ambient data** – ambient schema submissions (XML)
- **Calibration report** – continuous ambient monitoring, submitted along with ambient XML (PDF)
- **Lab Report** – passive ambient data report from laboratory, submitted along with ambient XML (PDF)
- **Airshed Monitoring Plan** – as per AMD Chapter 2 (no longer required; voluntary submission only) (PDF)
- **Airshed Monitoring Report** – monthly and annual submissions (PDF)
- **Ambient Site Documentation** – as per AMD Chapter 3 (PDF)
- **Airshed Ambient Monitoring Notification**– as per AMD Chapter 9 and AMD Notification template (PDF)

Submitters, for more information see, “Acceptable Formats for EPEA Approval and Code of Practice Records and Submission Coordinates” at <https://www.alberta.ca/assets/documents/ep-epea-approval-acceptable-formats.pdf>

Naming Guidelines

When uploading files for submission, note the file naming convention. For example when the Airshed Lab Report is submitted, the supporting file uploaded (highlighted with the red box on the left) is named “*LAB-LICA-201909-Comment.pdf*” in the format of “**LAB-XXXXXX-YYYYMM-Comments.pdf**”, where:

- “#####” - is the Airshed acronym;
- “YYYY” – monitoring year;
- “MM” – monitoring month;
- “Comments” – additional descriptor (optional).

Each file type has its own naming convention and to get more information on see the “*EPEA Approval Industrial Monitoring Documentation Submission Naming Guideline*”, at <https://www.alberta.ca/assets/documents/ep-epea-approval-industrial-monitoring-documentation-submission-naming-guideline.pdf>.

Submitters: To avoid errors when uploading, please ensure the proper naming convention is adhered to.

The naming convention for submitting Airshed Lab Report Data is “**LAB-XXXXXXXX-YYYYMM-Comments.pdf**”. More information: <https://www.alberta.ca/assets/documents/ep-epea-approval-industrial-monitoring-documentation-submission-naming-guideline.pdf>

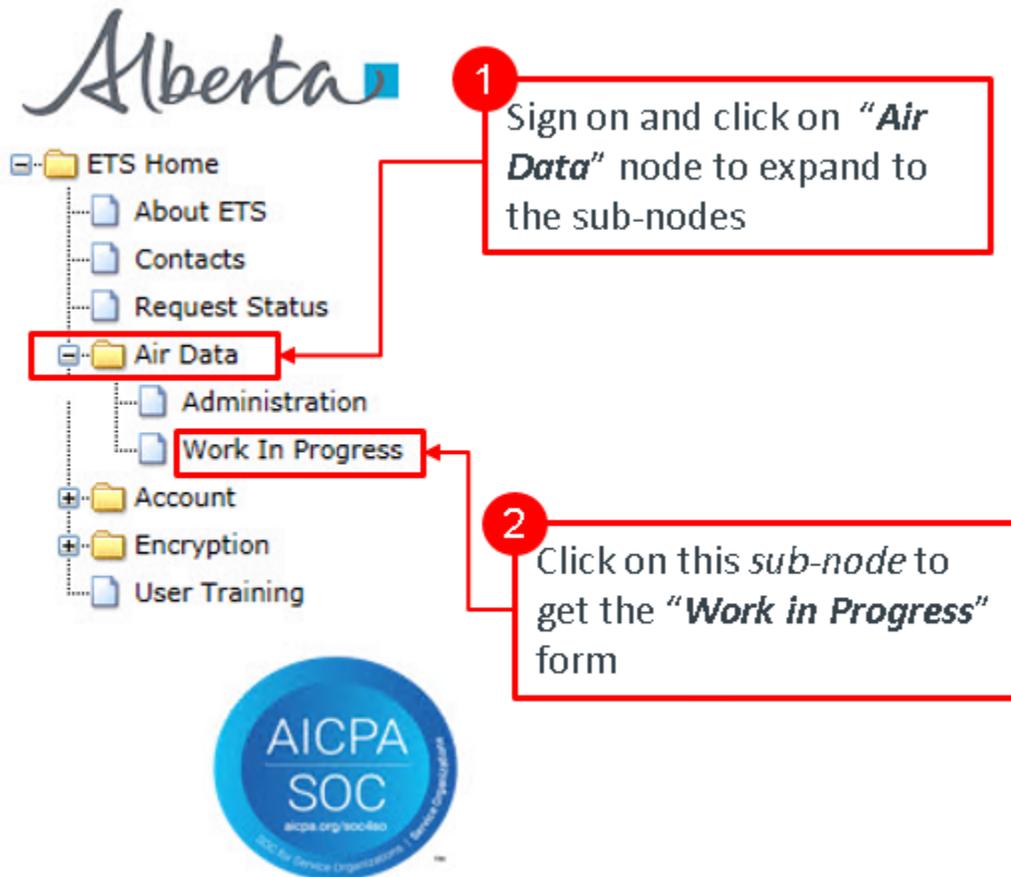

5. Work in Progress Form

The Work In Progress form is used to find the status of requests submitted.

To access the Work In Progress form, the Submitter, Reviewer, and Viewer can:

- Sign in;
- Click on the “**Air Data**” node to expand it;
- Click on “**Work In Progress**” sub- node ;

The “**Work in Progress**” form appears (below)

Work in Progress

Status:	<input type="text" value=""/>	Request #:	<input type="text" value=""/>
Start Date:	<input type="text" value="2019/10/13"/>	End Date:	<input type="text" value="2019/10/18"/>
Comment:	<input type="text" value=""/>		

Search Requests

To Search and retrieve requests, fill in the “**Work in Progress**” form using one or more of the following search criteria:

- a. Status* (drop down list);
- b. Request #;
- c. Start Date;
- d. End Date;
- e. Comment entered;

NOTE: if no criteria is entered, the result will return all requests under the account.

The screenshot shows a search form titled "Work in Progress" with the following fields: Status (dropdown), Request # (text), Start Date (2019/10/13), End Date (2019/10/18), and Comment (text). Below the form are "Find" and "Close" buttons. A callout box titled "*This is the list of Status types:" shows a dropdown menu with the following items: Work in Progress, Processing, Client Cancelled, Validating, Validation Failed, Pending Warnings, Warnings Failed, Pending Review, Review Passed, Review Failed, and Completed. A red box highlights the "Find" button with the instruction "Click on the 'Find' Button to get the search results." A red dashed line connects the Status dropdown in the form to the callout box. A light blue box at the bottom contains the note: "* The types of status was discussed in the Data Submission Overview."

Search Results

This is an example showing the results returned from applying the search criteria in the “**Work In Progress**” form. In this example, no criteria was applied which resulted in the results box (red box circled) showing the entire list of requests by:

- Request #;
- Status;
- Comment;
- Last Updated (“YYYY/MM/DD”).

For the desired request to be processed or viewed, the user can click on the desired request number.

NOTE: To shorten the list of results, re-do the search by filling in one or more of the search criteria elements.

Work in Progress

Status:	<input type="text"/>	Request #:	<input type="text"/>
Start Date:	<input type="text" value="2019/10/12"/>	End Date:	<input type="text" value="2019/10/17"/>
Comment:	<input type="text"/>

Page **1**

Click on the request number to view the request

6. Warning Form

This is the Warning form that the Submitter receives whenever there is a data validation failure. The Submitter selects the request number from the “**Work in Progress**” form.

The information the Submitter will see are:

- “*Pending Warnings*” Status;
- Warning Report link. Click on the link will bring up a report detailing the data validation errors;
- Submitter’s Name;
- Submission Date;

To approve or reject the request, the Submitter will:

1. Fill in any comments required in the “**Review Comment**” box (Mandatory);
2. Click the “**Approve**” for “**Reject**” button;

Clicking the “**Close**” button will return the Submitter to the previous screen.

The screenshot shows the 'Airshed Submission 433359' interface. At the top, there is a blue header with the submission ID. Below it, there are two tabs: 'Submission' and 'Warning/Review'. The main content area is titled 'Review/Warning' and contains the following information:

- Status: Pending Warnings
- Submitted By: EA1037_KIM
- Submission Date: 2019/08/12
- Warning Comment: [Redacted text box]

Below the comment box is a table with two columns: 'File' and 'File Type'. The table contains one row:

File	File Type
AMB-LICA-201908-Test1250.xml	Ambient Data

At the bottom of the form, there are three buttons: 'Approve', 'Reject', and 'Close'. A 'Warning Report' link is also visible in the top right corner of the form area.

Annotations with red boxes and arrows point to specific elements:

- A box labeled "The link to the Warning Report" points to the [Warning Report](#) link.
- A box labeled "The Submitter fills in the Warning Comments (Mandatory)" points to the redacted Warning Comment text box.
- A box labeled "The Submitter clicks the 'Approve' or 'Reject' Button to process the request." points to the 'Approve' and 'Reject' buttons.

7. Review Form

This is the Review form where the Reviewer/Viewer can review the request.

The request is selected from the “**Work In Progress**” form. The information provided includes:

- “**Pending Review**” Status;
- Submitter’s Name;
- Submission Date;
- Warning Comment (by the Submitter);
- File to be uploaded.

Clicking the “**Close**” button will return the Reviewer/Viewer to the previous screen.

NOTE: the “**Approve**” and “**Reject**” buttons shown here are available to the Reviewer only.

8. Data Submission Process

Upload & Submit Example

1. Select Company Name from the dropdown list.
 Note: The company name cannot be left blank (if only 1 company exists, it is defaulted by the system).

2. Add Comments - max length 60 characters (Optional Field).

3. Select File Type from the dropdown list.

4. Click the "Browse" button to select the file corresponding to the file type.

5. Click the "Upload" button to upload the file. Repeat steps 3-5 as needed to upload multiple files in one submission.

6. Click the "Submit" button to submit the file(s) for validation or "Delete" button to cancel the request.

Once the file(s) is/are uploaded successfully, a request number is generated. This request number will now be used to track the submission.

This is an example of a completed "Submission" form with an uploaded file (Submitters only). More than one files can be uploaded for each submission.

Client Cancelled Example

If the Submitter choose to cancel the request and to ensure no further processing takes place, click the "Delete" button. The screen on the right appears.,

The above message appears informing the Submitter that the status will change to "Client Cancelled" and no further processing will take place. Clicking "OK" button will change the status to "Client Cancelled". Clicking "Cancel" button will cancel that request

Once the Submitter confirms cancelling the request, the status changes to **“Client Cancelled”**.

Airshed Submission 433337

The screenshot shows a web interface for submission 433337. The status is 'Client Cancelled'. The company name is 'LAKELAND INDUSTRY AND COMMUNITY ASSOCIATION'. The file type is 'Lab Report'. A file named 'LAB-LICA-201909-Comment.pdf' is listed. A 'Close' button is visible at the bottom.

- Note the status has changed to **“Client Cancelled”**.
- The submission request cannot be modified at this time as indicated by the greyed-out areas.
- Clicking the **“Close”** button will take you back to the Sign-in screen.

Upload & Submit Example

Airshed Submission 433332

The screenshot shows a web interface for submission 433332. The status is 'Work in Progress'. The company name is 'LAKELAND INDUSTRY AND COMMUNITY ASSOCIATION'. The comment is 'Submitting ambient data file'. The file type is 'Ambient Data'. A file named 'AMB-LICA-201906-TestFile.xml' is listed. A 'Submit' button is highlighted with a red box.

Submit Save Delete Close

If the Submitter chooses to submit the file for validation, click the **“Submit”** button.

Certification

Airshed Submission 433295

I certify that the submitted data has been verified and validated as per the Air Monitoring Directive requirements. I have reviewed the report(s) and/or data and confirm that the information is complete, accurate and representative of the monitoring results, reporting timeframe and the specified analysis, summarization and reporting requirements.

Once Data Submission is successful, this screen appears. Clicking the **“Continue”** button will proceed to the Validating step. Clicking the **“Cancel”** button will return you to the Sign in page.

Validating

Once the Submitter clicks the **“Continue”** button on the certification message, the status on the submission form changes to **“Validating”**.

Note: the submission request form is greyed-out, meaning it cannot be modified.

1 Note the status has changed to **“Validating”**.

2 The submission request cannot be modified at this time as indicated by the greyed-out areas.

3 Clicking the **“Close”** button will proceed to the **“Work in Progress”** screen.

Validation Failed

When the request fails the validation process, ETS will send an email informing the Submitter that the request sent is rejected due to validation error(s) and the Submitter is to sign on to ETS, correct the error(s), and resubmit.

Your Air Data request number 433315 has been rejected due to validation errors.

Please sign on to ETS (Electronic Transfer System) to see the error report. The file will have to be resubmitted once errors are corrected.

To get further information on why the validation failed for a particular request, the Submitter will:

- Sign on to ETS;
- Click on “**Airshed**” node on the left of the screen;
- Click on “**Work in Progress**” sub-node;
- Enter the criteria to search for the results;
- Click “**Find**” button and get the results;
- Click on the desired request number with the “**Validation Failed**” status.

Airshed Monitoring Plan-LICA-20191010 Comment.pdf **3**

4 - File, Airshed Monitoring Plan-LICA-20191010 Comment.pdf does not match any reference naming convention. Potential naming convention(s) for the subject area, airshed monitoring plan include(s): Naming pattern, Airshed Monitoring Plan-##### e.g. Airshed Monitoring Plan-FAP-20190101.pdf.

Total Number of Errors: 1 **5**

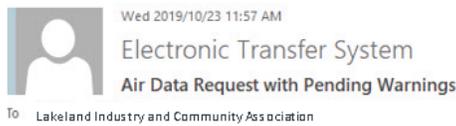

*** End of Report ***

Note: As described in the message, this submission generated an error indicating an incorrect file naming convention. Optional comments added to the file name should be preceded by a dash (i.e. "Airshed Monitoring Plan-LICA-20190101-Comment.pdf")

Validations Passed with Warnings Identified

If the request passes validation processing and warnings have been identified, an email is sent to the Submitter indicating there are warnings in the file that need to be verified. The Submitter will have the option to approve the request for it to go to the validation stage, or to reject the request for it to be resubmitted.

This next step in the process is **Pending Warnings**. If there are no warning errors, then the next step is **Pending Review**.

Your Air Data request number 433359 needs attention. There are warnings in the file that need to be verified.

Please sign on to ETS (Electronic Transfer System) to see the warning report. The file will continue with validations once these warnings are signed off or a file will need to be resubmitted if the warnings identify issues to be corrected.

Warnings (Submitter)

Steps in determining the requests that have “**Pending Warnings**” status:

- Sign on to ETS;
- Click on “**Air Data**” node on the left of the screen;
- Click on “**Work in Progress**” sub-node;
- Enter the criteria to search for the results;
 - “**Pending Warnings**” can be selected from the Status menu
- Click “**Find**” button and get the results;
- Click on the desired request number with the “**Pending Warnings**” status.

Email for Review

After the warning is approved, or if there were no warnings identified, an email from ETS is sent to the Submitter informing that the request needs attention and a Reviewer is required to sign off the submission. That next step is **Pending Review**.

Your Air Data request number 433295 needs attention. A Reviewer needs to sign off on the submission

If you do not have the reviewer role access assigned to your account, please contact the person with reviewer permissions, to inform them that they need to sign off the submission.

Pending Review (Reviewer)

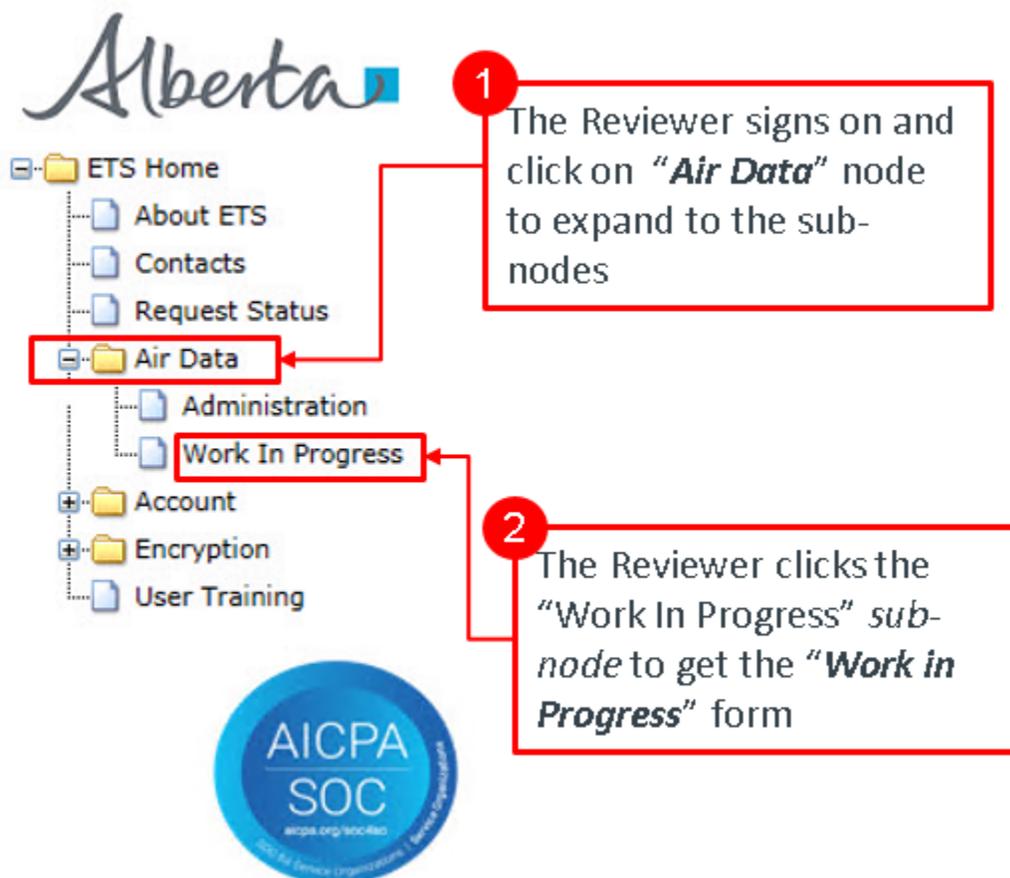

The Reviewer, will review all submissions made by the Submitter including those with warnings.

To start the review process the Reviewer will:

- Sign in;
- Click on the Air Data node to expand it;
- Click on Work In Progress sub- node ;

The “**Work in Progress**” form appears (below)

NOTE: If the Submitter is also assigned as the Reviewer and have made submissions, if they have passed the validation and warnings processes, they go straight to the completion stage skipping the review stage.

Work in Progress

Status:	<input type="text"/>	Request #:	<input type="text"/>

9:00:48 AM

Request # 433295

Submitted by: EA1037_KIM
Submission Date: Oct 17, 2019 8:34:21 AM

File Type
Lab Report

File Name
LAB-LICA-201909-Comment.pdf

Total Number of Files: 1

*** End of Report ***

Your report/data is not considered accepted by the department (Regulator) until status is completed.

Please Note:

- The Submission report is only available for 90 days following data submission, therefore you should download the report immediately.
- If you are unable to download the report within that 90-day period, you can email ETS@gov.ab.ca within one (1) year of the submission to request the report, otherwise the report will not be available.

9. Data Resubmission

If multiple files are submitted under one Request Number and one of those files fails:

- Delete the file with errors
- Correct errors in the file
- Re-upload the file
- Re-submit entire request

Note: When correcting file errors, a new request number is not required in order to re-submit. The corrected file should be re-uploaded to the same request number.

10. Amended Documents

If amended documents are required, note that the naming convention must still be followed.

Examples:

- Original LAB report (pdf): LAB-LICA-201901
- Amended LAB report (pdf): LAB-LICA-201901-V01
- Original Ambient Data (xml): AMB-LICA-201901
- Amended Ambient Data (xml): AMB-LICA-201901-V01

11. Error Types

During the submission process, the Submitter will encounter two (2) types of errors:

- File Validation Errors, and
- Data Validation Errors

File validation errors are encountered when the file(s), that are have been uploaded for submission fails the file validation rules before being processed for review. These errors must be corrected or no further processing can take place. Some examples of this type of error include missing company name, invalid file type, wrong naming convention, etc.

Data validation errors are encountered when the file(s) have been loaded for processing but fails the data validation rules before being reviewed by the Reviewer. The Submitter has the options of approving or rejecting the submission. Some examples of this type of error include invalid VVC code, approval ID does not match submitted approval ID, Resubmission for station ID and VVC Code, etc.

Examples of both type of errors are shown below.

File Validation Error

Here is an example of a file validation error. There are two (2) error messages printed in red at the top.

The errors are caused by the Submitter trying to upload a file of the wrong file type. For instance, the file, "LAB-LICA-201909-Comment.pdf," is being uploaded as an Ambient Data file type which must be a .xml file. To resolve this, the Submitter either upload the file in the Ambient Data file type (.xml), or choose the Lab Report file type (from the dropdown list) to upload the ".pdf" file format

Airshed Submission 433336

Airshed Monitoring Plan-LICA-20191010 Comment.pdf

- File, Airshed Monitoring Plan-LICA-20191010 Comment.pdf does not match any reference naming convention. Potential naming convention(s) for the subject area, airshed monitoring plan include(s): Naming pattern, Airshed Monitoring Plan-\$.##### e.g. Airshed Monitoring Plan-FAP-20190101.pdf.

Total Number of Errors: 1

*** End of Report ***

This is another example of a data validation error. This time the Submitter received a Warning Error indicating the data submitted needs to be reviewed before proceeding to the Reviewer. The Review/Warning form (top) has the status “**Pending Warnings**” and the Warning Report link. Clicking on the Warning Report link generates the Warning Report which indicates the file has been already submitted and resubmitting this file will overwrite previous data.

12. How to Determine Your Assigned Role(s)

To determine the role assigned to you:

Sign in to ETS;

1. Click “**Air Data**” node;
2. Click “**Administration**” sub-node (this will take you to the Administration screen);
3. Click “**User Roles**” (Blue band at top);

The User Roles screen appears showing:

- A. Coordinator’s name - the one who assigned you the role;
- B. Your name (select from the dropdown list);
- C. List of station(s) assigned to you;
- D. The role(s) assigned to you;

The screenshot shows the 'Roles Maintenance' interface. At the top, there are tabs for 'Air Data', 'Station Maintenance', and 'User Roles'. The main content area is titled 'Roles Maintenance' and includes the following elements:

- A:** Coordinator Name: EA1037 -- Richard sharkey; Coordinator Email: richard.sharkey@gov.ab.ca
- B:** User dropdown menu showing 'EA1037_KIMTEST -- Kim Tester'
- C:** Stations table with columns: Id, Station Name, Subject Area, Effective, and Termination. The table lists several stations, with some checked (e.g., 1176, 1177, 1178, 1181, 1182).
- D:** Roles table with columns: Role and Description. The 'Reviewer' role is selected.
